## Whole Foods Shell Building Tualatin, Oregon

The new 50,000-square-foot shell for Whole Foods Market in Tualatin is located next to R.E.I. and directly across from the Bridgeport Village lifestyle shopping center. The shell is being constructed of non-traditional CMU system that allows for a unique custom color and pattern on its exterior. Rooftop light monitors and 18-foot-high windows on the storefront will permit a large amount of daylight to enter the store. Sitework includes a large parking area capable of holding 221 vehicles.
